

Biora Therapeutics to Present Preclinical Data on the BioJet™ Systemic Oral Delivery Platform at the 59th Annual Meeting of the European Association for the Study of Diabetes

June 8, 2023

SAN DIEGO, June 08, 2023 (GLOBE NEWSWIRE) -- [Biora Therapeutics, Inc.](#) (Nasdaq: BIOR), the biotech company that is reimagining therapeutic delivery, today announced that it will present preclinical data on oral delivery of a GLP-1 receptor agonist with its BioJet systemic oral delivery platform in a short oral discussion at the 59th annual meeting of the European Association for the Study of Diabetes, to be held October 2–6, 2023 in Hamburg, Germany.

Details of the presentations are as follows:

Abstract Title: Evaluation of the Pharmacokinetics of Glucagon-Like-Peptide-1 Receptor Agonist Delivered through the BioJet™ Biotherapeutic Delivery Platform in Swine

Presentation No: 635

Discussion Session: SO 44 Novel Incretins

Date: Tuesday, October 3, 2023, 13:45 to 14:45 CEST

Presenting Author: Shaoying Nikki Lee, PhD, Director, Clinical and Translational Science, Biora Therapeutics, Inc.

Abstracts will be published on the EASD website on July 1, 2023. Short oral presentations are embargoed until 12:30 CEST on October 3, 2023. Details of the presentation will also be made available on the [Biora Therapeutics website](#) following the meeting.

About the BioJet™ Systemic Oral Delivery Platform

[Biora's BioJet systemic oral therapeutics platform](#) uses an ingestible capsule for needle-free, oral delivery of large molecules designed to achieve systemic bioavailability and replace injection for better management of chronic diseases.

The BioJet platform uses an ingestible device [designed to transit through the digestive system and activate in the small intestine](#), where liquid jets deliver drug directly into the intestinal tissue for uptake into systemic circulation. The BioJet device is approximately the size of a multivitamin and is designed to autonomously deliver a wide range of large molecules, such as proteins, peptides, and nucleic acids, in liquid formulation up to 400µL.

Biora is developing multiple molecules for delivery via the BioJet platform, including BT-002, a drug-device combination consisting of a variant of adalimumab delivered via the BioJet device for the treatment of inflammatory conditions, and BT-200, which consists of a GLP-1 receptor agonist delivered via the BioJet device for the treatment of type 2 diabetes. The company is currently advancing preclinical development of both programs.

About Biora Therapeutics

Biora Therapeutics is the biotech company that is reimagining therapeutic delivery. By creating innovative smart pills designed for targeted drug delivery to the GI tract, and systemic, needle-free delivery of biotherapeutics, the company is developing therapies to improve patients' lives.

Biora is focused on development of two therapeutics platforms: the [NaviCap™ targeted oral delivery platform](#) which is designed to improve outcomes for patients with inflammatory bowel disease through treatment at the site of disease in the gastrointestinal tract, and the [BioJet™ systemic oral delivery platform](#), which is designed to replace injection for better management of chronic diseases through needle-free, oral delivery of large molecules.

Safe Harbor Statement or Forward-Looking Statements

This press release contains "forward-looking statements" within the meaning of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995, which statements are subject to substantial risks and uncertainties and are based on estimates and assumptions. All statements, other than statements of historical facts included in this press release, including statements concerning the progress and future expectations and goals of our research and development and clinical efforts, are forward-looking statements. In some cases, you can identify forward-looking statements by terms such as "may," "might," "will," "objective," "intend," "should," "could," "can," "would," "expect," "believe," "design," "estimate," "predict," "potential," "plan," "target," or the negative of these terms, and similar expressions intended to identify forward-looking statements. These statements reflect our plans, estimates, and expectations, as of the date of this press release. These statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to differ materially from the forward-looking statements expressed or implied in this press release. Such risks, uncertainties, and other factors include, among others, our ability to innovate in the field of therapeutics, our ability to make future filings and initiate clinical trials on expected timelines or at all, our ability to obtain and maintain regulatory approval or clearance of our products on expected timelines or at all, our plans to research, develop, and commercialize new products, the unpredictable relationship between preclinical study results and clinical study results, our expectations regarding opportunities with current or future pharmaceutical collaborators, our ability to raise sufficient capital to achieve our business objectives, and those risks described in "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" in our Annual Report on Form 10-K for the year ended December 31, 2022 filed with the SEC and other subsequent documents, including Quarterly Reports, that we file with the SEC.

Biora Therapeutics expressly disclaims any obligation to update any forward-looking statements whether as a result of new information, future events or otherwise, except as required by law.
